What Are GoldexPlus Properties?

SECURE

It is the most secure way to store crypto assets. You will have the entire control. No one other than you can access your crypto assets because only you have the key [password].

PRIVACY

You don't need to leave any trace in the electronic environment. You don't need to share your personal data, ID information, EMAIL address or phone number with third parties. Only you will know that you have your crypto assets. Only you will know what and who you will send your crypto assets to.

CONVENIENCE

You can check your GoldexPlus account balance with just a single move. With AAPP+NFC synchronization, you can scan your physical card with your phone to access your account and you will eliminate any usernames and passwords to check your balance or transfer your assets.

What Benefits Will GoldexPlus Bring to Your Life?

The user will have the GPLUS physical card as the hot wallet. The user is authorized to design the card and use the wallet both as a cold wallet and hot wallet with a 12-character password or private key.

In addition to that, if the users forget the designated password, the users can have contactless access to their account from a matched smartphone by using the NFC infrastructure without needing the password.

With this technology, the user can contact our company if the phone, card or EMAIL address is stolen to freeze and store the assets.
